

How to run the Daily event

First of all close your game “Game.bat”

Then open PhpStudy then open Mysql font

Go to cokdb1

Go to activity table

Copy the start time from any event as you see in the picture

id	name	type	openTime	startTime	endTime
110004	MonsterSiege	4	1498755600139	14987556009	1498755600993
8999	ws	0	1498755600139	14987556009	1498755600993

After that go to serverinfo table in the same database

>	server_history_top_score
>	server_info
>	server mail record

Select only the first 7 tables

uid	activityTime	activationTime	kaifu	yangfu	daoliangStart	daoliangEnd	shuaguaiActStart
server	0	0	0	0	0	0	0

Instert the time you have copied from activity table

In the 7 tables then open the game “game.bat”

WARNING : This event is not stable so in the first time you active it it might not work and then it will work fine.
